Omnitech Infosolutions, a provider of disaster recovery (DR) solutions, plans to launch eight new DR management sites in the country within the next two years.

Omnitech Infosolutions, a provider of disaster recovery (DR) solutions, plans to launch eight new DR management sites in the country within the next two years. In addition, the company is also contemplating to unveil such sites outside India.

“We are launching these sites to help enterprise face disasters of all kinds without disrupting their business. Such sites will help them to prepare for disasters across the city, state and country. If organisations have their DR site in the same city and in case of any disaster in that city, both the sites will become non-functional,” said Atul Hemani, Managing Director, Omnitech Infosolutions.

The new DR sites identified by the company as of now include Ahmedabad, Bangalore, Chennai, Hyderabad, Gurgaon, Nagpur, Nashik and Pune.

The DR site in Hyderabad is under development and will be the first to go live within a few weeks. Omnitech already has a third party workplace recovery centre in Navi Mumbai which is operational since February 2008.
