

Client

Global Leading Firm offering Retirement Planning

Offering

Independent Acceptance Testing (IAT)

Company Overview

Our Client offers a first-of-its-kind one-stop solution to help you achieve your key financial goals and attain a financially independent and secured retirement. Retirement is the core competency, representing over 90% of total assets under management globally.

They have been at the forefront of the retirement and pension market in the US and in several markets across the globe. With over 130 years of experience and expertise, they aim to leverage on its strengths and replicate its success in India by helping clients achieve their financial dreams. Besides US, they offer retirement solutions in 15 countries across Asia, South America & Europe.

Growth

Client gained an increase in the user and customer satisfaction

Efficiency

Reduced post production defects by 25% and with 0% defect leakage to production

Cost

Reduced cost on testing efforts through achieving detection rate of 90% for high-severity defects

The Challenges and Our Solutions

Client aimed at enabling customers to achieve their financial dreams both pre and post retirement and giving customer an edge in the marketplace. Omnitech participated in Independent Acceptance Testing (IAT) of the wealth management product that customer purchased.

The challenges vis-à-vis solutions delivered by Omnitech are as below:

Challenge : 3rd party vendor gave a version change towards the fag end of the time line.

Solution : Deployed certified professionals with deep industry domain expertise in wealth and asset management.

Challenge : Stability and performance of the application was unknown as it was the first time implemented by the client.

Solution : Omnitech delivered quality on time and within budget through integration, system, and user acceptance testing.

Challenge : Since the application was developed by a 3rd party, the turnaround time of bug fixes was critical as the time span to "Go Live" was short.

Solution : Omnitech's end to end test process approach helped the Client achieve wide test coverage in turn attaining higher level of test maturity hence mitigating technical and business risks.

Benefits

Omnitech delivered the following benefits to the client:

- Omnitech's optimized quality assurance processes reduced post production defects by 25% and with 0% defect leakage to production through test management.
- Wide test coverage and efficiencies helped the Client by reducing defect leakage and which in turn increased the user and customer satisfaction.
- Testing efforts measurably improved the quality of the application by achieving detection rates of more than 90% for high-severity defects.
