

Payments Hub

With increasing competition, rising internal pressures and new industry initiatives such as Single Euro Payments Area (SEPA), financial institutions need to seek out a holistic and highly sophisticated processing solutions that would allow them to achieve higher Straight-Through-Processing (STP) rates, real-time visibility and increased efficiency from payment initiation through to back-end processing.

By consolidating and streamlining various payments processing into a single, central platform; financial institutions are able to optimize payments and cash flow management, achieve higher levels of STP, enjoy real-time visibility of financial transactions and reduce costs.

RTGS STP

(Real Time Gross Settlement – Straight Through Processing)

RTGS System is a payment platform where instructions between banks are processed and settled individually and continuously through the day in real time.

Straight Through Processing (STP) for RTGS allows for the payment instructions and transactions to be keyed in only once and processed until settlement.

The two major factors that would instigate banks to do this are:

- To enhance the delivery cycle by creating a straight through process from the branch banking solution to the head office and into the RBI RTGS solution.
- To speed up processing, create a robust, integrated and scalable solution.

Service Offerings

Our wide range of Payments Hub and Straight Through Processing Services guarantees best fit operational and executional plans for innate business needs coupled with enhanced service levels, effective response rates, round the clock availability, scalability and reliability.

True payments leadership requires not only improving your internal efficiency but also finding cost-effective, competitive ways to reduce fee erosion, deliver innovative and fast services, and improve customer loyalty. Omnitech InfoSolutions helps you excel in all of these areas.

Some of the key differentiators which make us best among others and give our customers a competitive edge are:

- Expertise in Straight Through Processing (STP)
- Increased end-to-end enterprise-wide transparency
- Standards for compliance
- Allows financial institutions to offer a "Single Window" to its payments customers
- Optimised unit transaction costs and customer satisfaction by choosing the appropriate clearing venue

- Reduced operational & transactional cost
- Robust & scalable with established expertise in RTGS / NDS
- Expertise and competency in IBM WebSphere suite (WAS, MQ, etc)
- World class Network Operations Centres (NOC) and 24x7x365 support

From engagement to partnership

At Omnitech, we bring together rich domain knowledge and strategic business consulting skills to our customers from "Engagement to Partnership" in a business climate characterized by rising customer expectations and increasing business costs.

Our Hallmarks of Distinction

Omnitech distinguishes itself with a lifetime's commitment to quality and strong focus on customer-needs from other global service providers. Omnitech strongly believes that people, systems, processes and vendors are all an integral part of its endeavor to serve its customers better. Hence, the company invests heavily in knowledge, technology, resources and improved people skills. Highly efficient work environment with ISO 9001:2008 certified processes, usage of leading process management tools like Rational Product Suite, Microsoft Project Manager, including a proprietary Web Based Problem Reporting and Tracking Tool are some of the key differentiators which gives Omnitech a distinctive edge. In addition, Omnitech lays equal emphasis on providing quality solutions that are devised to improve functioning and increase productivity thereby enabling its customers to focus on their core businesses.

The 4P's of Excellence

Omnitech benchmarks itself to strengthen its long term relationships with existing and new business partners. Some of the factors that make Omnitech a preferred choice among top notch global services providers are:

- **P**ioneers with unmatched capabilities in managed DR centres, network operating centres (NOC) across India
- **P**roprietary APDIMA methodology with flexible framework driven by best practices
- **P**liable approach and customized services/solutions geared to meet needs of every client
- **P**roven reputation for unmatched project risk management and on time performance

APDIMA - The Omnitech Way

To its customers, Omnitech promises total commitment and attention to detail on a continuing basis. The proven way that contributes towards this goal is the company's proprietary "APDIMA" methodology. APDIMA is an open and flexible methodology, working on the premise of multiple customer interactions. It enables continuous interactions with the company's valued customers - right from conceptual analysis to planning, solution designing, implementation, post implementation management and regular audits of investment protection and ROI. APDIMA thus builds in a tremendous sense of personal attention, adding value to the company's services.
